

"Quality You Can See"

Room Where You Dare

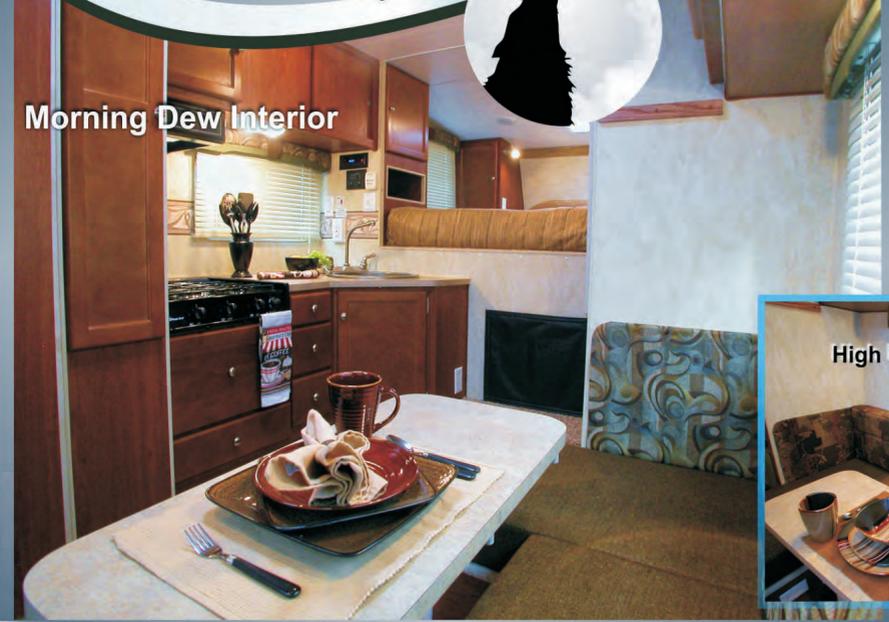

Light Duty Truck Camper

WOLF CREEK

WOLF CREEK

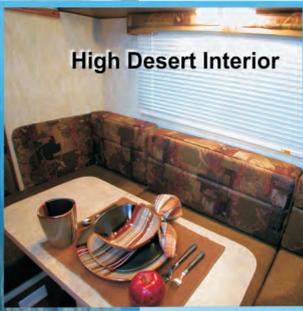

"Room where you dare"

Morning Dew Interior

'Dining in' is hassle free. The dining table slides in to create aisle space and slides away to create seating space. The dinette cushions are durable, high density foam and they are reversible so you can place the vinyl side up to protect the fabrics from the kids wet swim suits. The large window provides plenty of ventilation and allows you better viewing of your scenic surroundings. Durable mini blind shades provide privacy without sacrificing ventilation and they are adjustable to help you control glare or exposure.

High Desert Interior

Storage, storage, storage-everywhere you look there is storage. No scrimping here whether it's the wardrobe closets in the bedroom, or the abundant cabinets, drawers and pantry in the main cabin, the Wolf Creek 850 is designed to accommodate your camping needs and unlike most light duty campers the 850 comes standard equipped with a gas/electric fridge...and it's even upgradeable!

Meal prep and clean-up are a snap in the 850 kitchen. The large basin and the high profile faucet will accommodate large pans. The well lit counter offers plenty of work space and an optional counter extension is available. The cook top is larger than the competition by providing a third burner. Cooking options like microwave and conventional ovens are also available in the Wolf Creek 850 to accompany the standard equipped high output 3 burner cook top.

The lighter, narrower footprint of the 816 Wolf Creek means you will travel more efficiently, but it's smart space planning allows plenty of room and provides all the amenities you expect from a well appointed truck camper. Functional counter space is situated between the high profile faucet with large basin and the 3 burner cook top and an optional microwave oven is available in the 816. The Wolf Creek is equipped with a number of 110v power outlets and one is conveniently located in the kitchen for your coffee pot, toaster, or slow cooker.

The Result: Beautiful quality cabinetry!

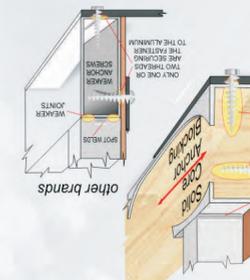

By integrating the cabinet with the ceiling and walls, our cabinets are both made stronger.

Face Frame Construction
We use the same construction techniques used in quality residential cabinetry. We assemble hardwood styles with screws on a face frame machine to ensure strong, durable cabinets.

Top Quality Materials
All NORTHWOOD cabinets are made with residential quality materials and methods. Because we use screws they hold up better under travel/road conditions.

Solid Wood Face Frame Cabinetry
We build our own cabinets and every cabinet is built to the best quality specifications. By building our own cabinets, we can guarantee that they will be made right and are built to last!

Solid Core Anchor Blocking
We also add solid core anchor blocking in the frame perimeter. The solid blocking provides a substantial anchor medium for securing screw threads.

Steel Bondedz
We add steel bondedz strips inside the wall at all mounting points. The bondedz provide a steel anchor point for any fixtures that are mounted to the walls.

One Piece Continuous Fiberglass
The outer skin of our laminated wall is a single sheet of tough, corona treated fiberglass. Corona treating ensures the urethane is able to properly accept the hot melt adhesives.

One Piece Laminate Walls
Our aluminum wall frames are constructed of .060 thick aluminum tubing and all joints are welded full width, not spot welded like much of the competition.

Absolute Northwood
Quality Strength
Our Guarantee of Durability
"Where Quality is Everyone's Responsibility"

No compromises here. The wet bath in the Wolf Creek features durable, molded components to make sure that the water goes nowhere but directly to the grey tank. The Wolf Creek wet baths are built tough, are heavy gauge and very durable. All wet baths include a shower and toilet and a ceiling vent, plus a toiletry cabinet and a rack to dry your towels or wet clothing.

Just close the privacy curtain to escape into your 816 bedroom. All the necessities are included. You'll find an inner spring mattress with a designer bedspread to keep you comfortable. There is a night stand for your book and glasses as well as adjustable reading lights and electrical outlets for your clock radio. Whether in the wardrobe or on the storage shelf, your belongings will be as snug as you are.

WOLF CREEK

"Room where you dare"

The Wolf Creek is very versatile should you need to accommodate additional guests for the night. The optional overhead combination bunk/cabinet provides cabinet storage when not being used as a fold-down bunk. The dinette also converts to a sleeper when the adjustable table is lowered and the cushions are repositioned. And for those considering the 850 model, an optional roll-over sofa is available in place of the dinette.

"Quality You Can See"
