Our Impressions: 2012 Wolf Creek 850

Truck Camper Magazine Review
August 2011

Spending two weeks in the 850 gave us an unusual opportunity to experience a new brand and product.

For starters, the 2012 Wolf Creek 850 is right up our alley; hard-side, non-slide, fully self contained, and brimming with practical and weight saving design choices. In short, we love campers like this because they are everything we need for the kind of long-distance, go-wherever truck camping we enjoy. Even more important, they show a willingness of manufacturers to embrace the increasing importance of lower weight truck campers and design new campers accordingly.

We really appreciated the generous holding tanks for a camper this size. Thirty gallons of fresh water? That's amazing... The grey and black tanks were also ample at twenty-two gallons and twenty gallons respectively... When we turned the vent fan on, it surprised us with just how much air it pulled...

... they put a very tall bubble window in the bathroom that allowed me, at 6'3", to see almost completely around the camper... it was really fun to be able to look around and see what was going on outside the camper...

We were mixed on our impressions of the dinette. We liked how big it was, but wondered if it needed to be quite this wide. Northwood explained that it was wide to allow for an adult-sized sleeping area. It certainly was. The dinette was also comfortable and worked well during our two weeks in the camper. I appreciated the long cushion that allowed me to stretch out. We found an outlet under the dinette in the perfect place to plug in our laptops. Nice touch.

Kitchen storage and counter space were plentiful for a truck camper this size. We also liked the round sink and tall faucet. Having a large storage drawer under the cooktop instead of an oven was another practical cost and weight saving decision. As we get more experienced with cooking in a truck camper, we use camper ovens more and more. That said, we didn't use a camper oven at all except to store pots and pans until the past couple of years. Could we live without the oven? We sure could. Did we appreciate the additional storage of the drawer where the oven would have been? You bet.

The three cubic foot refrigerator was smaller than we're used to, but it fit our normal round of groceries with ease. What we lost in space we gained in a lighter weight refrigerator. We can't all ask the manufacturers to make their campers lighter without being open to options like a smaller refrigerator. This is a compromise I could live with as we never found the space in the refrigerator to be lacking. Sure, it's nice to have separate freezer and refrigerator sections, but this was perfect for what we needed.

On the driver's side overcab entry was a standard cabinet with an open storage spot just underneath it. We used this for overflow items and found it to be very useful and practical. It also saves a little more weight by not having a door. We really liked it.

We also appreciated the storage under the overcab step-up. We put our sneakers in there when we were wearing sandals, or vice versa.

As always, little things make the biggest differences. For example, the overcab reading lights in the Wolf Creek are outstanding. Unlike too many other overcab reading lights, they are not too bright or too hot.

Some overcab reading lights make you wonder when the men in black will arrive to ask you exactly where you were on October 18th, 1972, and what you were doing there. We also appreciated that these lights were easy to move. I liked them pointed away, as pictured, to give a more indirect and ambient light.

On the passenger's side of the overcab, the Wolf Creek had what I would call a night stand. The front of the night stand had an opening and storage area where I placed my sweatshirts and jeans. Just like at home, I put some reading material and my iPod touch (alarm clock) on the nightstand.

When we were plugged in, I really appreciated the outlet that was also with the nightstand. Personally, I prefer this nightstand to the traditional overcab-nose storage. The driver's side of the overcab nose had the traditional storage cabinet and Angela was so jealous of my nightstand. Did I offer to switch sides? No way, Jose!

For someone looking for an aluminum framed, hard-side, non-slide truck camper that will work with some half-tons and nearly every three-quarter ton truck, the 2012 Wolf Creek 850 deserves to be on your short list. This is an impressive camper from a company that understands truck campers and cares deeply about quality control. Congratulations Northwood on your new Wolf Creek truck camper brand and an impressive first camper with the 2012 Wolf Creek 850.

We also appreciated the storage under the overcab step-up. We put our sneakers in there when we were wearing sandals, or vice versa.
